

BOCM - Engineering Technology and Information Division  
New Product Coordinator

This notice has been logged into the efile.  
Michael E. McGonagle

June 2, 2010  
Mr. Jones-

The Department has determined that your above referenced product is a construction aid, and is not a Bulletin 15 item, therefore Bulletin 15 listing is not needed for use on PennDOT projects. Subsequently, your application (PE 2010-136) has been closed.

Please be advised that this in no way implies or constitutes an endorsement of your product. However your product may be used on Department projects if it is field accepted by the project engineer/inspector.

Thank you for your willingness to provide materials to the Commonwealth of Pennsylvania. We are always interested in the pursuit of new products in our highway construction projects.

-Rod
