April 7, 2011

John,

I just wanted to thank you for showing me your Kodi Klip system. I started a job that had over 600 columns for the VW Assembly plant here in Tennessee. We started off using wire ties. I have 6 people tying rebar cages and they were having a hard time keeping up with production. When I started using Kodi Klip, I was able to go down to 2 people. Those 2 people were able to keep up with production and even able to get a day to 2 days ahead. The cages were rigid and didn't fall down when we moved them around. The cost that I saved in labor was great. I will continue using the Kodi Klip on everything that I can.

Again Thanks John,

Moe Bertelsmann  
Plant Manager
